

Mahesh Puri

Principal Software Engineer

PROFILE

Hands-on Principal Software Engineer with 9+ years of experience in scalable enterprise applications, Java, Spring Boot, Microservices, Kafka, Spring Batch, SCDF, Angular, MongoDB, REST APIs and collaborating with global stakeholders across the US, UK, and Europe.

SKILLS:

- Java 8, java 17
- Spring Framework
(Core, MVC, Data JPA, AOP, Actuator)
- Spring Boot, Rest API's, Microservices
- Spring Batch, Spring cloud data flow
- Spring Cloud sleuth + Zipkin
[Distributed logging]
- Apache Kafka
- Angular 8, 13 etc...
- HTML 5
- CSS 3
- Bootstrap
- JavaFX (Desktop App)
- MongoDB, PostgreSQL, MySQL
- Azure, AWS, Docker, Kubernetes, Jenkins, Ansible, Linux
- JavaFX (Desktop App)

TOOLS & OTHER SKILLS:

- Maven 3.x, Sonar, SVN, GitHub, Bitbucket, Jira etc...
- Swagger/Open API, Junit, Mockito, log back config

Leadership & Delivery:

Technical Leadership, Module Leadership, Scrum Master, Agile/Scrum, Mentoring, Requirement Analysis, PBI Refinement, UAT & Production Delivery

Architecture & Engineering:

System Design, Technical Solutioning, API Design, Distributed Systems, Performance Optimization, Code Review, Production Support, RCA, CI/CD

CAREER HIGHLIGHT

- Improved Sprint Review Goal achievement from approximately 70% to 95% by strengthening code review, delivery tracking, and engineering execution.
- Led 6 engineers for a strategic US laboratory onboarding and third-party LIS replacement initiative from requirements through UAT and production delivery.
- Reduced a critical data-processing pipeline delay from 10–12 hours to 45–60 minutes and reduced processing time by 50% across another optimization initiative.
- Led migration of 7 applications/ecosystems to private cloud infrastructure and drove CI/CD and runtime configuration activities.

PROFESSIONAL EXPERIENCE

Principal Software Engineer

Apr 2025 - PRESENT

Eurofins Genomics | Bangalore

- Design and deliver full-stack capabilities for Blueberry Sequencing LIMS, a microservices-based platform supporting sequencing labs across Denmark, the UK, and the US.
- Develop and review scalable solutions using Java, Spring Boot Microservices, Angular, MongoDB, REST APIs, and Azure CI/CD.
- Improved code review and sprint execution processes, increasing Sprint Review Goal achievement from ~70% to 95%.
- Led 6 engineers for Clinical Enterprises Lab onboarding and Seacoast LIS replacement, driving requirements, PBI refinement, technical delivery, UAT, and production rollout.
- Delivered the DK Array Lab Collector replacement initiative, contributing to approximately €100K in business cost savings.

Senior Software Engineer

Nov 2022 – Apr 2025

MiQ digital India | Bangalore

- Delivered large-scale data-processing solutions using Spring Boot, Spring Batch, Spring Cloud Data Flow, and AWS S3.
- Optimized the Always On vendor pipeline, reducing processing delay from 10–12 hours to 45–60 minutes through dependency and execution-flow analysis.
- Optimized Yahoo jobs and composed-task pipelines, reducing processing time by 50% through dependency-based reorganization and scheduling.
- Reduced TTD Pixel and Strategy job ingestion time from 1 hour 40 minutes to 41 minutes through batch-processing optimization.
- Conducted Tier-1 DSP load testing for the U.S. political season; analysed CPU and memory utilization, identified bottlenecks, and implemented stability and performance fixes.
- Served as Scrum Master and helped the team achieve three consecutive quarterly awards; mentored 2 junior developers and 1 intern.

EDUCATION

Bachelor of Engineering

2014 – 2017

University of Pune, India.

Diploma in Information Technology

2010 - 2013

MSBTE, Maharashtra, India.

Analyst Application Development

Apr 2021 – Nov 2022

Net Connect Global | Bangalore

Worked with a U.S.-based global banking client, contributing to the full software development lifecycle, from analysis and design to development and deployment.

- Delivered enterprise solutions for a U.S.-based global banking client across analysis, design, development, deployment, and production delivery.
- Developed RAC Automation capabilities using Spring Boot, Angular, Oracle, and Camunda.
- Led migration of 7 applications/ecosystems to private cloud; configured Jenkins pipelines, Ansible automation, Tomcat, Apache HTTPD, SSO, and related runtime components.

Software Engineer

Jan 2019 – Apr 2021

Neosoft Technologies | Mumbai

Worked onsite for NSDL e-Governance Infrastructure Limited, Mumbai.

- Developed Spring Boot microservices and Angular applications for e-governance, telemedicine, and digital identity solutions supporting international programs, including the Philippines and Morocco.
- Contributed to the Modular Open-Source Identity Platform (MOSIP), developing identity registration capabilities and migrating the JavaFX-based Registration Client to Electron.js using Spring Boot, Angular, JavaFX, PostgreSQL, Electron.js, and Node.js.
- Designed and implemented patient registration and profile management microservices for a Telemedicine platform using Spring Boot, PostgreSQL, and Angular.
- Developed enterprise workflows for the PAN Form 60 application, including entity registration, Maker-Checker processes, PAN validation, OTP verification, and email service integrations

Jr Software Engineer

Nov 2017 – Jan 2019

RSL PVT. LTD, AKURDI | Pune

Developed the Accounts module for a Medical Business Accounting desktop application using Java 8, JavaFX, and Hibernate.
